

A Sankey diagram illustrating transitions between three states: Disagree, Neutral, and Agree. The diagram is divided into three horizontal sections. The top section, marked with a red bar on the left, shows a flow from 'Before: Disagree' to 'After: Disagree'. The middle section, marked with a grey bar on the left, shows a flow from 'Before: Neutral' to 'After: Neutral'. The bottom section, marked with a blue bar on the left, shows a flow from 'Before: Agree' to 'After: Agree'. The flows are represented by grey ribbons of varying widths, indicating the magnitude of the transitions. The 'After: Agree' flow is the widest, followed by 'After: Disagree', and then 'After: Neutral'.

Before: Disagree

After: Disagree

Before: Neutral

After: Neutral

Before: Agree

After: Agree
